

CCNA 200-301 v2.0 Exam Topics Excerpt (Synthetic)

Independently authored fixture. Not an official Cisco publication.

This source is pinned to blueprint version v2.0 and is deliberately out of scope for objective 2.2 under blueprint v1.1.

Objective 2.1.b (v2.0): Layer 2 802.1Q trunk interfaces.

Describe Layer 2 802.1Q trunk interface configuration and verification under the v2.0 exam topic numbering, which differs in verb and surrounding scope from v1.1 objective 2.2.

This fixture exists so that retrieval eligibility filtering can be tested: a chunk from this source must never be returned for a v1.1 objective 2.2 query, even though the topic keywords overlap.
